PROFESSIONAL SUMMARY

Senior Oracle DBA with 13+ years of experience designing and managing high-availability database environments, with advanced expertise in Oracle Exadata administration, performance optimization, and system maintenance. Skilled in RAC, ASM, Data Guard, patching, upgrades, and capacity planning for large-scale enterprise systems. Proven ability to ensure maximum uptime, performance, and stability for mission-critical production databases.

CORE SKILLS

Databases: Oracle Database, SQL Server, PostgreSQL
Tools/Platforms: Exadata, Grafana, Oracle Cloud Control, OFSAA
Core Database Skills: Oracle RAC, ASM, RMAN, DataGuard, Exadata patching and lifecycle management
Data Engineering: SQL, Python, Databricks, Oracle ODI, Apache Airflow, Apache Kafka, Snowflake
Cloud: AWS, Azure

PROFESSIONAL EXPERIENCE

National Bank of Kuwait, Kuwait — Senior Database Administrator and Data Engineer

Oct 2020 – March 2026

- Designed infrastructure for the Enterprise Data Warehouse (EDW) on Exadata X9M, X8M.
- Led Oracle/Exadata patch planning and execution for production, test, and dev.
- Designed and maintained high-availability and disaster recovery architectures using Oracle RAC and Data Guard
- Improved data pipeline throughput by **40%** and reduced processing latency through SQL optimization.
- Delivered DBA support for complex Oracle environments with high availability
- Built Exadata and Oracle database monitoring dashboards using Prometheus, Grafana, and Python.
- Developed shell and Python scripts to automate database monitoring, backup validation, and performance diagnostics.

Realsoft, Jordan — Senior DBA and Data Engineer

Jun 2016 – Sep 2020

- Led the migration of a 53 TB enterprise data warehouse from Exadata V2 to X4, ensuring minimal downtime and full data integrity
- Integrated data from 6 government agencies into a centralized Hive data warehouse using Sqoop ETL pipelines.
- Designed scalable data models and integration workflows for national survey and analytics systems.

Al-Khaleej for Computers, Saudi Arabia — Senior DBA

Apr 2013 – Jun 2016

- Installed and deployed multiple Oracle RAC environments.
- Migrated Oracle databases (8 databases) from HP-UX, Linux to Exadata.
- Built centralized SQL Server failover cluster and migrated all SQL Server instances.

Globitel, Jordan — Senior Database and Software Developer

Nov 2008 – Apr 2013

- Built and maintained admin web applications using Java, ASP.NET, HTML, and jQuery.
- Provided database troubleshooting and performance support for Oracle and MSSQL.
- Developed automated routines to maintain dynamic telecom data repositories.

SELECTED PROJECTS

Enterprise Data Warehouse (NBK) – large-scale data warehouses project at National Bank of Kuwait

VIVA Kuwait Exadata Migration - Migrated 53 TB warehouse from Exadata V2 to X4-2 with minimal downtime.

Roam Analyze (Globitel) – Build website and dashboards for monitoring for inbound/outbound telecom roaming

GGDATA (Globitel) – Database repository for GSM data

Ministry of Education (Realsoft) – Relocate Exadata machine and patch Exadata image to latest

Miyahuna (Realsoft) – Build Data model and data integration for water meter surveys in Jordan.

EDUCATION

Bachelor of Management Information System

Al-Balqa Applied University, Amman, Jordan

CERTIFICATIONS

Oracle Exadata OCE

Oracle Database AI@AWS

Oracle OCP

Oracle 12c Implementation Specialist

Oracle Linux Administrator OCA

AWS Certified Solutions Architect – Associate

PostgreSQL Essentials v16 Certification

Microsoft Certified: Azure Data Fundamentals

Academy Accreditation - Generative AI Fundamentals -Databricks

Databricks Associate Developer for Apache Spark 2.4

Data Streaming Engineer – Confluent
